Procedure Trays

Efficient

Reduce procedure prep and turn-around time with pre-sterilized, ready-to-use trays that go straight from [shelf to surgery](#).

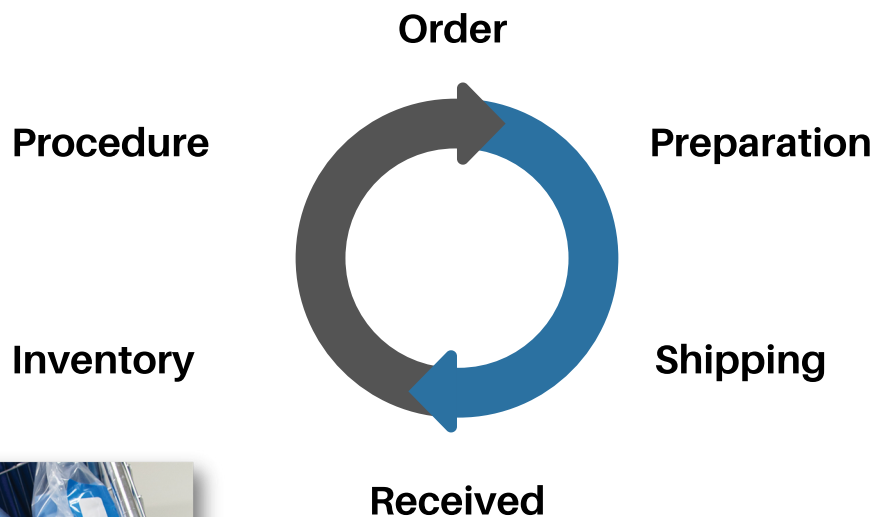

Economical

Custom trays are prepared in a professional facility without any time lost on the part of your staff. Conventional on-site tray preparation requires hours of sterilization, acquisition, and arrangement. [Ready-to-use custom procedure trays save you time and money](#).

Enhanced Inventory Control

The Advanced Planning System forecasts point-of-use demand and develops weekly inventory plans. [Real-time in-stock data keeps your inventory pipeline moving](#) and materials ready.

Customizable, ready-to-use OR procedure trays delivered directly to your facility based on doctor preference cards.
