# carePATCH<sup>™</sup>

## STERILE DUAL LAYER AMNIOTIC MEMBRANE ALLOGRAFT

### Characteristics

- carePATCH<sup>™</sup> is a dehydrated tissue product stored at ambient temperature with a 2 Year Shelf Life.
- carePATCH<sup>™</sup> retains amniotic membrane's natural structure including epithelium and basement membrane layers.
- carePATCH<sup>™</sup> acts as a wound cover, that is a natural bandage shielding wounds from its external environment.

### Configurations

These different configurations serve as barriers for different types of wounds.

**Figure 1** Disc sizes 12mm-16mm

**Figure 2** Patch 2x2cm -4x8cm

### Amniotic Tissue as a Barrier

- Amniotic membrane adheres closely to its underlying surface as a cover protecting wounds and may help prevent formation of dead space on wound.<sup>2,3</sup>
- Amniotic membrane's barrier function may help prevent infiltration and adhesion of microorganisms to wounds.<sup>2,3</sup>

### Applications

carePATCH<sup>™</sup> is intended only for homologous use as a barrier that protects wounds from the surrounding environment during the wound healing process.<sup>1</sup> This includes non-healing wounds and surgically created wounds.

- Wound Covering
- Venous Stasis Ulcer Covering
- Diabetic Foot Ulcer Covering
- Burn Covering

**Figure 3** Amniotic membrane of carePATCH<sup>™</sup> where epithelial layer is in purple/blue areas and basement membrane is in pink.

### Manufacturing

- The amniotic membrane for carePATCH<sup>™</sup> is sourced from healthy deliveries of placental tissue with material consent.
- carePATCH<sup>™</sup> is produced using minimally manipulated amniotic membrane in a dual layer composition.
- Through minimally manipulated methods carePATCH<sup>™</sup> retains amniotic membrane's original relevant characteristics relating to its utility to serve as a barrier, specifically its physical integrity, tensile strength, and elasticity.
- carePATCH<sup>™</sup> retains the amniotic membrane's key structural components related to its utility to serve as a barrier, specifically:
  - Epithelium Layer
  - Basement Membrane
- carePATCH<sup>™</sup> is dehydrated, packaged, and terminally sterilized with a 2 year shelf life.

**Disclaimer:** Please consult your doctor to see if tissue allograft is right for you. No medical advice has been offered herein. None of the statements in this brochure have been evaluated by the FDA.

Amniotic tissue allografts are not intended to diagnose, treat, cure or prevent any disease.

The carePATCH<sup>™</sup> product meets all criteria to be compliant with Human Cell, Tissue and Cellular and Tissue-Based Products (HCT/P) that are regulated solely under section 361 of the Public Health Service Act and under 21 CFR Part 1271 as confirmed by a letter from the Tissue Reference Group.

## Ordering Information

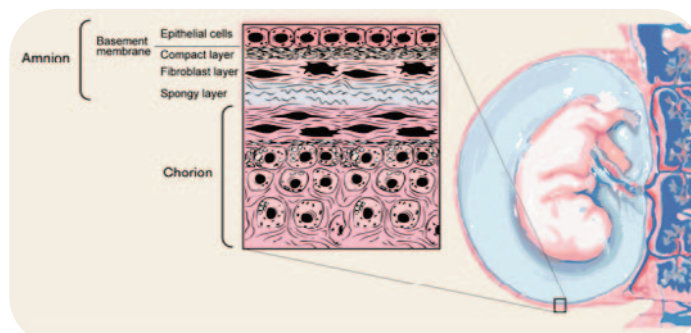

SKU	Name	Description
CPT022S	carePATCH™	carePATCH™ Amniotic Membrane 2x2cm
CPT023S	carePATCH™	carePATCH™ Amniotic Membrane 2x3cm
CPT024S	carePATCH™	carePATCH™ Amniotic Membrane 2x4cm
CPT044S	carePATCH™	carePATCH™ Amniotic Membrane 4x4cm
CPT046S	carePATCH™	carePATCH™ Amniotic Membrane 4x6cm
CPT048S	carePATCH™	carePATCH™ Amniotic Membrane 4x8cm
CPT055S	carePATCH™	carePATCH™ Amniotic Membrane 5x5cm
CPT312S	carePATCH™	carePATCH™ Amniotic Membrane 12mm Disc
CPT316S	carePATCH™	carePATCH™ Amniotic Membrane 16mm Disc

carePATCH™ is delivered in a convenient high density envelope-packaging system for ambient storage conditions. Ask about careLOG.

## Human Amniotic Membrane Background

- Amniotic membrane is the inner most layer surrounding the fetus<sup>4</sup>, that is comprised of various layers primarily:
  - epithelial cell layer
  - thick basement membrane
  - an avascular stroma (further comprised of compact, fibroblast, and spongy layers).<sup>3</sup>
- The tissue's tensile strength is attributed to its epithelial cell layer and basement membrane (refer to Figure 1.)
- Furthermore, amniotic tissue has been characterized in the literature to comprise a rich proteinaceous components like collagen types I, III, IV, V, and VI, and a host of growth factors.<sup>3</sup>
